NOTICE OF PROPOSED AWARDS Geothermal Grant and Loan Program Grant Funding Opportunity GFO-16-505 March 9, 2017

On November 14, 2016, the California Energy Commission (Energy Commission) released a Grant Funding Opportunity (GFO-16-505) titled "Geothermal Grant and Loan Program (GRDA)." This competitive grant solicitation requested applications from eligible local jurisdictions and private entities for geothermal energy-related projects in California. The activities allowed for proposed projects included local and regional geothermal planning, geothermal resource assessment and exploration, geothermal direct-use and electric generation technology research and development, mitigation of geothermal development impacts, and provision of public services necessitated by geothermal development. The solicitation announced that up to \$4,740,000 in grant funding was available, with applications due by January 20, 2017.

The applications received for GFO-16-505 have been reviewed and evaluated using the criteria described in the solicitation. Based on the Evaluation Committee's scores, the Energy Commission proposes to award funding to five projects. The attached table titled "Notice of Proposed Awards and Results of Submitted Proposals" identifies each of the proposals recommended to receive funding, the project title, the recommended amount of Energy Commission funding, and scoring information.

Funding of the proposed projects resulting from this solicitation is contingent upon all of the following: 1) applicant submittal of sufficient documentation to support an Energy Commission determination that a decision to approve funding for a project complies with the California Environmental Quality Act (CEQA); 2) approval of the project grant agreement at a publicly noticed Business Meeting of the Energy Commission; and 3) execution of a grant agreement by all parties. If an applicant cannot provide sufficient documentation of compliance with CEQA in the timeframe required by the Energy Commission, and/or the Energy Commission and applicant are unable to negotiate and execute a grant agreement within the timeframe required by the Energy Commission, the Energy Commission, at its sole discretion, reserves the right to cancel a proposed award and recommend funding of the next highest scoring proposal that can meet the approval requirements above.

This notice is being mailed to all parties who submitted an application to this solicitation and is also being posted on the Energy Commission's website at:

http://www.energy.ca.gov/contracts/index.html. For additional information or questions about this notice, please contact Diana Parmley, Commission Agreement Officer, at (916) 651-9409, or by email at Diana.Parmley@energy.ca.gov.
